Slow Cooking We live in a fast paced world. We want everything easy and quick especially in preparing delicious meals for our family. But sometimes, going slow can be quite advantageous. Slow cooking is a cooking method that utilizes low heat for an extended period of time. The food prepared using this method will become oh-so-tender and more flavourful. In the past, slow cooking involves putting a pot in the stove over a low fire for several hours.

Unfortunately, this leaves room for the homemaker to do anything else since the flame needs constant supervision. If not, the pot may over boil, dry out, and cause a fire if left on for too long even on low. Fortunately, this wont be an issue anymore since the slow cooker has already been invented. Aside from that, the resulting meals can be prepared fast. The meals are also really healthy and seasoned. Stir-frying with the use of a wok leads to the creation of meals that can lead to the creation of beautiful works of art in the form of good food. This method is best suited for making meals for one or two people. But if you will choose to cook meals for many people, this can be used, too. Many people see the wok as an unattractive ornament in the kitchen. This notion is common among people who are not aware of the kinds of dishes that can be made from it.
