

Successful Small Gardens: Eleven Tips For Growing Food In Tight Spaces

Do you want to grow your own food, but your only space is a patio or postage stamp-sized backyard? This article reveals several critical tips to making small gardens not only possible, but successful as well. An urban garden is, by definition, tight on space, and vegetable gardening in such a space is both an art and a science. But it need not be rocket science! This article shows you: *the number one backyard garden design for people with limited space; *how shady spots may be more useful than you think; *how to incorporate several vertical garden ideas into your design; *a unique method of growing herbs that can save you at least twenty square feet of space; *the most space-efficient places to plant the big guys like rosemary and borage; *and more! Vegetable gardening is possible even if you only have a few square feet to spare. Small gardens are becoming more and more numerous as people seek to improve their health with nutrition and become more self-sufficient in food. This article (about 4200 words) will help you get started right with your small-space garden. *****ONE MORE THING: Are you about to buy this article? You may also be interested in five of my other gardening articles, as well. These articles give you a total of 57 gardening tips about starting seeds, building a cheap raised bed, extending your harvest, gardening in small spaces, effective organic pest control, and generally improving your backyard garden success. You can get all six at once and save 50% off the price of purchasing each article individually (\$2.99 versus \$5.94). Simply search Gardening Nuggets Emily Josephine in the Kindle store, or find it on my author page at <http://amazon.com/author/emilyjosephine>. * * * * * Emily Josephine has been studying, teaching and writing on the subject of natural health and nutrition since the late 1990s. A health nut and a

homesteader, she can be found, at various times, harvesting fresh produce from her garden, managing the household finances, making fresh milk yogurt and kefir, and homeschooling her son. Her passion is to help others create the most healthy, fulfilling life possible, while working tirelessly to improve her own.
