

## Newtons Ark (The Emulation Trilogy Book 1)

How far would you go to survive the end of the world? December 20, 2047 - the day the human race faces extinction. With a little more than two years to prepare, President Paul Carlson struggles with the awful choices he must make to ensure the survival of the American people. Meanwhile wealthy industrialist James Newton, aided by ace programmer Cyrus Jones, embarks on his own audacious and radical plan to save humanity. As both sides race against time and the growing economic and social collapse, Major Regina Lopez finds herself caught between these competing forces. Which side will she choose as she faces sacrificing everything she thought she believed in to protect the people she loves?
