

## Liberty: Seeking Support for a Writ of Habeas Corpus for a Non-Human Being (Tales from the Labyrinth)

Ellen R lies imprisoned, gagged and blindfolded, her wrists and ankles shackled. On her behalf, a law firm launches a peer-sourced project to underpin their petition - for a robot to be given liberty. From award-winning author Samuel Peralta comes Liberty, a provocative short story that asks the question: What is it that makes us human? Liberty is one of a series of standalone stories about a labyrinthine world where time travel is just beginning to be realized, where pervasive surveillance by telepaths is a part of life, where non-human self-awareness has begun to make humanity face difficult questions about itself. Welcome to the Labyrinth. Welcome to Liberty.
