

## Annals of Theoretical Psychology

Early in 1986 I invited Professor Robinson to collaborate on a volume of the Annals devoted to the theme of the person in psychology. He accepted my invitation later that year suggesting, instead, that the volume be devoted to the theme of explanation in psychology. I gladly compromised for, as I knew from his extensive writings on the history and philosophy of psychology, the concept of explanation is firmly rooted in philosophical anthropology. The contributions by Rom Harre, James Lamiell, Joseph Margolis, and George Miller were available in June, 1988, and the commentaries and replies to commentaries early in 1989. Fortunately, foundational papers wear well, as the content of the present volume so aptly testifies. Beginning with Volume 6, the Annals will be entirely edited and prepared using the computer facilities at our Center. Thanks to the dedicated effort of my colleague, Professor William Baker, this is the first volume produced from camera-ready copy. His personal support and technical expertise made the transition to desk-top publishing somewhat less than formidable. Mrs. Valerie Welch, our Center secretary, entered the text and managed my personal correspondence; Casey Boodt proofread the entire manuscript; and the University of Alberta continues to support my involvement with this series. Dan Robinson's commitment to scholarship also extends to the more mundane task of editing. Every volume with a co-editor is a challenge; he made this one a delight.

**Annals of Theoretical Psychology Daniel N. Robinson Springer** This is the first of a two-volume work in the Annals series devoted to developmental psychology.
