

## The Pedestal

Wilson Abbys life as a carefree programmer has reached a crossroads. Since birth, Wilson has known unconditional comfort and security in a global super-community. Thanks to the planets NEXUS framework, instant gratification is a mere transaction away. But when his closest friend mysteriously turns up dead, Wilson suspects that not all is as it seems. Peeling back a veneer of half-truths, Wilson makes a startling discovery everyone that people will kill to bury, starting with Wilsons coworkers and loved ones. As deadly forces close in, Wilson has no choice but to abandon his home for the seclusion of an off-planet research base. There, far from the probing gaze of the NEXUS, a beautiful scientist is busy playing God with monstrous consequences.

The Pedestal is a thrilling glimpse into a society madly infatuated with integration and endless consumer upgrades. Wilson must battle gangsters, conspiring politicians and hordes of flesh-eating creations before civilization is toppled from its pedestal.
