

Assessing Grammar: The Languages of LARSP (Communication Disorders Across Languages)

This collection is a resource book for those working with language disordered clients in a range of languages. It collects together versions of the well-known Language Assessment Remediation Screening Procedure (LARSP) prepared for different languages. Starting with the original version for English, the book then presents versions in more than a dozen other languages. Some of these are likely to be encountered as home languages of clients by speech-language therapists and pathologists working in the UK, Ireland, the US and Australia and New Zealand. Others are included because they are major languages found where speech-language pathology services are provided, but where no grammatical profile already exists.
