

Autism Report Writing

Written autism reports contain very important elements in guiding decisions for young children related to autism educational eligibilities and educational placements. Susan Louise Peterson, award winning autism author and school psychologist helps professionals look at examples of writing and optional writing formats for phrasing autism reports. Autism Report Writing covers writing about initial autism concerns and referrals as well as input from parents and teachers. Autism Report Writing also includes ideas about autism behavior, understanding, communication, social, compliance issues and toleration responses. The book ends with ideas for writing recommendations in autism reports. The goal of Autism Report Writing is to help professionals write autism reports that give a clear description of the child and his or her complex nature.
