

Diver Creed Station

Wars, disease and a massive collapse of modern civilization have ravaged the human race of a hundred years in the future. Finally, in the late twenty-second century, mankind begins to struggle back from the edge of extinction. When a huge virtual life facility is restored from a hibernation storage and slowly brought back online, a new hope materializes. But this system is haunted by the long lost past.

System ghosts intermingle with mysterious factions that place two young technicians into a virtual reality trap, with little hope for survival.
