

## Creative Destruction

Computing is mere decades young, a set of technologies we have scarcely begun to develop. Its already been quite a ride. Now: Imagine every gadget around you becoming ever faster, cheaper, tinier, more interconnected, more intelligent ... especially more intelligent. The stories in Creative Destruction explore what we could face in the next half century or so: artificial intelligence, malicious software to makes us nostalgic for mere viruses, ever-more-perfect virtual reality, direct neural interfaces to computers, ubiquitous networks, and more. The internet? That was nothing.
