

Do Androids Dream of Electric Sheep?

The most consistently brilliant science fiction writer in the world.--John Brunner THE INSPIRATION FOR BLADERUNNER...Do Androids Dream of Electric Sheep? was published in 1968. Grim and foreboding, even today it is a masterpiece ahead of its time. By 2021, the World War had killed millions, driving entire species into extinction and sending mankind off-planet. Those who remained coveted any living creature, and for people who couldn't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep... They even built humans. Emigrants to Mars received androids so sophisticated it was impossible to tell them from true men or women. Fearful of the havoc these artificial humans could wreak, the government banned them from Earth. But when androids didn't want to be identified, they just blended in. Rick Deckard was an officially sanctioned bounty hunter whose job was to find rogue androids, and to retire them. But cornered, androids tended to fight back, with deadly results. [Dick] sees all the sparkling and terrifying possibilities... that other authors shy away from.--Paul Williams, Rolling Stone
