

## Icarus (Kestrel Saga) (Volume 2)

Intelligence reports have begun to filter in from the former Outer Sphere: the Kafaran hordes are rearming, aligning themselves and their past allies into a new force known as The Army of Light. Half a decade ago, the Unified Collaboration of Systems barely managed to defeat them, and the cost had been grievously high. With Unified Sector Command fleet strength down to perilous levels, it is anyone's guess who will come out the victor this time. Shawn Kestrel, former civilian cargo pilot, has been mysteriously recruited back into Sector Command. Even more baffling is that he is ordered to take command of an elite squadron of advanced starfighters, incorporating technological improvements beyond anything he's ever seen before. However, before Shawn has a chance to immerse himself into his new role, a derelict ship from a missing fleet suddenly appears, and the questions it raises have dire consequences that will reverberate throughout the entire galaxy. Working alongside the striking intelligence agent Melissa Graves, Shawn must uncover the truth behind the fate of the Icarus before it's too late.
