

## Erewhon, or Over The Range

Samuel Butler's *Erewhon, or Over the Range* was published anonymously in 1872. In this satire of Victorian society, the main character Higgs discovers an unknown country, the seeming utopia called Erewhon, Nowhere backwards with the h and w transposed. The starting chapters detailing the discovery of Erewhon were based on Butler's experiences in New Zealand as a young man. Butler was possibly the first to write about the idea that machines might one day develop consciousness through the process of Darwinian Selection.
