

Escape to Earth-Defending Holy Ground

From the International Bestselling Author, Saxon Andrew, comes the third book in the Escape to Earth series, Defending Holy Ground. The Invasion from M-87 has been delayed by the destruction of the Conduit that was built connecting the two galaxies. But the Leaders in that gigantic galaxy are not giving up easily and they intend to find the High Energy Being they detected and kill it. Their fear of the Sentinel will push them to make a series of questionable decisions. Pat is the last remaining Sentinel in the Milky Way and he intends to do whatever is necessary to protect the civilizations in the Fellowship by offering Earth up as a sacrifice. Humanity has decided that they are not going out without a fight to defend the planet of their ancestors. The fight to defend this Holy Ground is going to be beyond imagination and the numbers coming to attack will be overwhelming. Millions of Earths population have been moved to Andromeda but time is running out on those that still remain. What the leaders of Earth dont realize is that the last Sentinel will lead the invaders to Earth if they dont find it on their own and defending this holy ground is beyond anything they can do. The action continues and picks up speed in the third book in the Escape to Earth series.

Excerpt from Defending Holy Ground: The numbers of damaged Orange Ships popping into normal space were staggering. Induras and Windys ships began salvoing their DM Missiles and they bore in on the magnetic fields the Invader ships emitted. The wave of destruction was running rampant in the Invaders ranks as Gunny and Kitchs Fleets joined Windy and Induras ships; in a few moments, space was filled with missiles accelerating into the mass of the Invaders that had been hit and damaged in the void. Windy watched the destruction and shook her head, Pan, what about the wave still in the void? The probe shows that they are continuing to move

above and below the balls. Some are starting to slow down. Windy yelled into her communicator, GET OUT OF HERE!! THEYRE SENDING SHIPS OUT OF THE VOID!! Gunny yelled on his fleet frequency, SKIP NOW!! A massive wave of Invader ships appeared in normal space and opened fire on the four ONE WORLD fleets. Hundreds of battleships began blowing up around Gunny just as his battleship left normal space. A giant wave of the Invaders disruptor beams shot out at the thousands of DM missiles that were fired by the battleships. However, even though the Dark Matter warheads had their thrusters burned off, they continued to be attracted to the magnetic fields of the Invader Ships. They picked up speed and massive explosions walked the ranks of the Invader Ships that had just arrived in normal space.
