

Life: a natural history of the first four billion years of life on earth

Life: A Natural History of the First Four Billion Years of Life on Earth is a non-fiction book written by British paleontologist Richard A. Fortey. It was originally published in hardcover in Great Britain by HarperCollins Publishers, under the title Life: An Unauthorised Biography. Fortey used this book to explain how life has evolved over the last four billion years. It discusses evolution, biology, the origin of life, and paleontology. Under its various titles it has become a best-seller; according to WorldCat, it is in over a thousand public libraries in the United States alone.
