

Landscaping Human Habitat

The inherent desire in most human beings is to live in beautiful environments. This book is a holistic guide to landscaping and beautifying human habitats. The concepts and details presented in the book serve as a useful resource for ideas and techniques for greening and embellishing the entire physical environment including living, working and recreational spaces. The breadth and depth of plants and planting information in the book makes it very relevant for the entire spectrum of plant lovers, from amateurs to landscaping experts. The book is especially valuable for professionals who are responsible for creating good habitats for all people. It is an excellent reference book for all kinds of landscape materials - one that every ardent gardener and professional must own.
