

ON THE STRUCTURE AND DISTRIBUTION OF CORAL REEFS; and geological observations on the volcanic islands and parts of South America visited during the voyage of H.M.S.Beagle.

Pp. xx, 549, with 6 plates (3 folding). Full polished dark blue calf, five raised bands, elaborately gilt-decorated spine compartments, gilt-border decorated on front cover, with marbled page edges and matching marbled endpapers, sm 8vo. Freeman 279. Includes a critical introduction to each work by Prof. John W.Judd. From the Minerva Library of Famous Books, no. 18. This volume was given as a prize by Manor House School, Clapham - the emblem of the school appears in gilt on the front cover. This is a beautifully bound copy suitable for any collector.
