

Kirov Trilogy (Kirov Series Book 1)

The opening trilogy of the longest running alternate history epic of WWII ever told three novels at a special introductory price! Sail with Admiral Leonid Volsky, Captain Karpov and the intrepid navigator Anton Fedorov on the most powerful surface combatant in the world, the battlecruiser Kirov, updated and recommissioned in the year 2021. On a routine live fire exercise in the Norwegian Sea, a strange incident displaces the ship in time to July 28, 1941. As the crew struggles to discover what has happened to them, they are soon presumed to be a fierce new German raider, and engaged in a running battle with the Royal Navy. The ship's position in time is unstable, and the opening trilogy sees them battling all comers in the Atlantic, the Mediterranean, and finally the Pacific as they struggle to reach a friendly base at Vladivostok, and hope to find a way back to their own time. The Kirov Series is a group of linked novels that will eventually see the author recounting the entire history of WWII, and in a world that has been radically altered by the many interventions and changes in history that Kirov has introduced. The series is structured in trilogies that are linked together by what the author calls a bridge novel. At the conclusion of this trilogy, readers interested in continuing the saga can move to the bridge novel Men Of War, which acts as both a sequel to this opening trilogy, and a prequel to the second trilogy in the series that begins with Book V: 9 Days Falling. Though the series action is principally centered on a retelling of WWII, it also spans two centuries, from 1908 to the outbreak of World War III in 2021.
