

Mission: Harbeasts of Mars

Crash landing! After a rowdy victory celebration following the battle of Europa, Bob goes for a stargazing trip in the desert and wrecks his speeder. Stranded, he soon finds he isn't alone. Harbeasts, the savage, fearsome, genetically engineered predators that roam the Martian deserts are hot on his trail! With no water or food, limited air supply, no working vehicle, and the nearest way-station days away, Bob finds himself in a dogged fight for survival. Unfortunately, he also finds that the harbeasts aren't the only predators out to get him. ----- From The Author Are you looking for science fiction that echoes back to the positive outlook of Golden Age science fiction? Need a break from mundane science fiction or nihilistic science fiction and just want a fun yarn to read? Did you enjoy Buck Rogers or Flash Gordon? Do you like A Princess of Mars by Edgar Rice- Burroughs? Do you love classic Star Wars or Star Trek: The Original Series? If you've said yes to any of these, check out The Mission space opera series. It's a fun romp through space. Get ready for a bold adventure! Q: There's a lot of good science fiction out there. Why should I read this series? What makes the Mission space opera novels contrast with other modern science fiction series out there? The Mission series is a mix of new and old science fiction influences. Most of all it has the old aesthetic, an optimistic view on humanity's future. Science fiction has lost much of that which made it so much fun to read, in my opinion. When I set about writing this series I'd just finished the Red World trilogy, a long, complex, Dune/ Old Testament-like sword-and-sandals fantasy series with a huge glossary and extensive appendixes and author notes. With this series I wanted the stories to be fast-paced, full of adventure and fun and most of all, hopeful about the future. There are serious challenges and uncertainties that the hero

faces, certainly, but this series has a positive outlook on humanity's eventual future. I was mainly inspired by Edgar Rice-Burroughs's Barsoom series and George Lucas's original Star Wars films, as well as other science fiction influences from the past. Bob Astor, the hero in the books is a regular guy working in a big corporation who has a keen curiosity, a good heart and a willingness to help others in trouble and he gets himself into hot water along the way to saving the day. ----
Q: In what order should I read these books?
You can read them in any order you want and still enjoy them but there is a specific story arc in the books that progresses as the story moves forward. But below is the series order: Flight to Mars Lights of Langrenus Attack on Europa Harbeasts of Mars Blackguard Conspiracy A Venus Affair (TBA) Phoenix Rising (TBA) Future Fantastic (TBA)
