

Atlas of Laparoscopic Surgery

This full color atlas is a step-by-step pictorial guide to all laparoscopic general surgery procedures-laparoscopic cholecystectomy, laparoscopic appendectomy, laparoscopic management of peptic ulcer, laparoscopic left colon resection, and laparoscopic herniorrhaphy. The photographs demonstrate each step of each operation, and text and legends thoroughly explain each surgical maneuver. The presentation is organized so that the surgeon can review a procedure preoperatively or use the atlas intraoperatively as a ready reference and the authors offer advice on how to avoid common pitfalls and handle frequently encountered surgical problems.
