

The Liquefaction of Gases: Papers (Classic Reprint)

Excerpt from The Liquefaction of Gases: Papers The papers by Faraday on the Liquefaction of Gases, here reprinted, give an account of the earliest work carried out at the Royal Institution on that most interesting and important subject, with which the Institution has been more or less intimately associated for three-quarters of a century. The extreme beauty and simplicity of Faradays experiments, as well as the peculiarly felicitous manner in which his various experiments are described, render these papers especially instructive, and suitable for reproduction in the series to which this little volume belongs. It was considered advisable to reprint Faradays Historical Statement respecting the Liquefaction of Gases, and, for the sake of greater completeness, to include, in the form of an Appendix, the papers of Mr. Northmore which are particularly referred to in that Statement. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
