

# Not By A Mine

NOT BY  
A MINE  
RYAN MCCALL

In 1904 Russia and Japan were the two great powers of Asia and their competing interests would soon spark a war that would set the stage for revolution and chaos in Russia and an aggressive and expansive stance in Japan, each of which would define their future development through the 20th century. But what if Russia had won the war instead? How would Japan react if it could not claim to be an equal to the western powers as it did in our history? How would this affect both Russia and Japans international relations with other countries? A Japanese sea mine which detonated in our history does not here and the effects ripple out, detailing an alternate history that never was through authored historical works, newspaper articles and real time accounts as well as notes for each chapter with details on background history.
