

The O.D.

A virgin landmass is extruded into the Bay of Biscay by a solar-tidal magmatic pulse. Waiting to claim the emerging island are 80 people in a flotilla of trussed up barges with supplies to last a year. Who are these accidental tourists? How did they know the island would be surfacing? And what do they plan to do with it if their claim to sovereignty is accepted by the world community? Racy and thought-provoking, The O.D. paints a picture of how humanity's rush to self-destruction could be halted, given the global will to take a colossal leap backwards.
