

Tropical Forests: Some African and Asian Case Studies of Composition and Structure (Developments in Agricultural and Managed-Forest Ecology)

This publication deals with the composition and structure of both natural and artificially established tropical forests. After a general introduction, the role of tropical forests in the production of timber is discussed. Attention is then given to the structure of natural tropical forests, especially in Congo, Gabon, Ghana and Laos. The structure of artificially established forests is dealt with in another chapter. At the end, information is given on the thinning of such forest stands in Tanzania.

Ecology and Society: Sustainable Forest Management in the Tropics Tropical forests : some African and Asian case studies of composition and structure / Jan Borota Developments in agricultural and managed-forest ecology 22. This publication deals with the composition and structure of both natural and **Ecological evidence for sustainability of logging in the tropics - FAO** A definition of sustainable tropical forest management for wood production Management of Natural Tropical Forests, ITTO Policy Development Series No. 1. as a conservation tool should include at least some of the following conditions: .. of objectives through manipulation of the composition and structure of a forest.
