

## Life with Judy: Living with an Epileptic Dog

Judy was diagnosed at the age of 18 months, soon after her first fit. This is a frank and personal account of the difficulties and joys of learning to live with an epileptic dog. It is not all doom and gloom and the good days far outweighed the bad days. Thankfully, very few epileptic dogs are as profoundly afflicted as Judy was. It is hoped that this book will provide some insight into the condition, helping to alleviate any fears a dog owner may have when their beloved pet is first diagnosed. Both dog and owner can look forward to a long a happy life together.
