

Only Human (Targon Tales Book 2)

Captain Nova Whiteside is assigned to the elite Vanguard task force assembled to combat an increasingly dangerous rebel force. Her no-nonsense new commander is of an enigmatic and reclusive species that soon figures most decisively in the balance of power. Their pursuit of a ruthless rebel leader takes them through the worlds and dangers of the Commonwealth-dominated Targon sector where the line between their personal lives and their mission quickly begins to blur. On their quest to recover a dangerous, living weapon in rebel hands it seems that the greatest opposition comes from among their own people and Nova must choose between duty to her command and loyalty to her friends. Although the Targon Tales are numbered chronologically, each book is a complete adventure. The volumes describe common themes, settings and characters but can be read in any order. More adventures with the fiery redhead as she dazzles the universe. Chris You are headed to the top of my author list with this series. I know who I want as my co-pilot when I go to space.
