

The Salts of the Earth and Synthetic Insanity: The Bipolar Theory: A Physical Explanation of Bipolar Mental Illness

The Salts of the Earth and Synthetic Insanity by Dennis Miller is a radically different view of the cause of Bipolar Mental Disorder. Author Dennis Miller uses physiology and biochemistry to explain this disease, also known as manic-depression. This book is unlike any other book on bipolar disease. Author Dennis Miller sets forth a physiologic explanation of the symptoms and cause of this disease. Author Dennis Miller proposes that the mental symptoms are a result of a physiologic disease that affects the kidney. Author Dennis Miller substantiates this theory with over 200 footnotes, many from the medical texts *Harrisons Principles of Internal Medicine* and *The Merck Manual*, National Institute of Health, and major universities. If you have this disease or if you are involved in the treatment of this disease, then *The Salts of the Earth and Synthetic Insanity* is an absolute necessity.
