

And All Things Between: A Science Fiction Thriller

After 10,000 years, he is returning home, hoping to fulfill his last desire. But only if his catastrophic past can be forgiven by the world he left behind, Jack is barely human; just part of his organic brain remains protected and supported by his metaform body. He hopes for a peaceful end to his life, on Earth with his rejuvenated family, but Earth's managing Artificial Intelligence has other intentions. With the aid or hindrance of Debois, the AI's slightly odd emissary, Jack will have to repair some of the damage he has caused over the millennia; he will have to locate and destroy the 7 copies of himself he created and hid to ensure the survival of his biological material. But he has to be quick; Number Seven is leaving the known universe at a significant proportion of light speed, Number Two is eating worlds, and Number Five is coming for him. A science fiction thriller, told with more than a touch of comedy; destined to be one of the decades Science Fiction Bestsellers, and its also a unique First Contact Novel. If you like your SF books filled with alien worlds, action and adventure, and a unique Hero, then maybe you should add this to your Science Fiction and Fantasy library of Kindle books.
