

Rain Forest Animals (Discovery) (English and Spanish Edition)

This volume on rainforest animals is part of a series of books which cover a wide range of subjects. As they read this book, children learn about the variety of animals that live in the jungle rainforests around the world. They discover what a rainforest is and where they are found, which mammals, insects, reptiles, birds, fish and plants live there, and how humans have affected the environment. The book features a gatefold, which opens up to show a jungle scene, packed with animals and plants that are found in the different layers of the canopy of trees. A fun quiz at the end enables children to test their knowledge.
