

Warm-Weather and Cold-Weather Animals (Animal Opposites)

Built around the colour artwork, this series is aimed at first readers. By comparing two ideas these books are designed to capture the personality of different animals. In this book the author takes various animals that live in warm climates (aye-aye, turtle, zebra, toucan, lion) and compares them to animals that live in cold climates (penguin, snowy owl, snow leopard, polar bear, yak). By captioning the illustrations and giving information about each animal, the work is intended to encourage the readers awareness of the animal world.
