

# Wounds and Lacerations: Emergency Care and Closure

WOUNDS AND LACERATIONS discusses wound care in the emergency department from the patients arrival to discharge through follow-up care. Topics covered include basic and complex wound care, anatomy, wound healing, infiltration anesthesia, cleansing, irrigation, choice of suture materials, and consultations. New to this edition: new chapters on pediatric aspects of wound management, cutaneous and superficial abscesses, tetanus immunity and wound prophylaxis; a second color that highlights key elements in text and illustrations; new alternative wound closure techniques, such as staples and wound adhesives; nosocomial infection is discussed in detail, advances and local anesthesia and wound cleaning techniques are discussed; and antibiotics are updated throughout. An up-to-date source of the principles and techniques of wound care in the emergency department. More than 290 detailed illustrations explain techniques for wound care visually and succinctly. Focuses on problem-solving in wound care situations, with debates on the pros and cons of differing approaches. Offers solutions to real-life situations.
